Role A = Passage

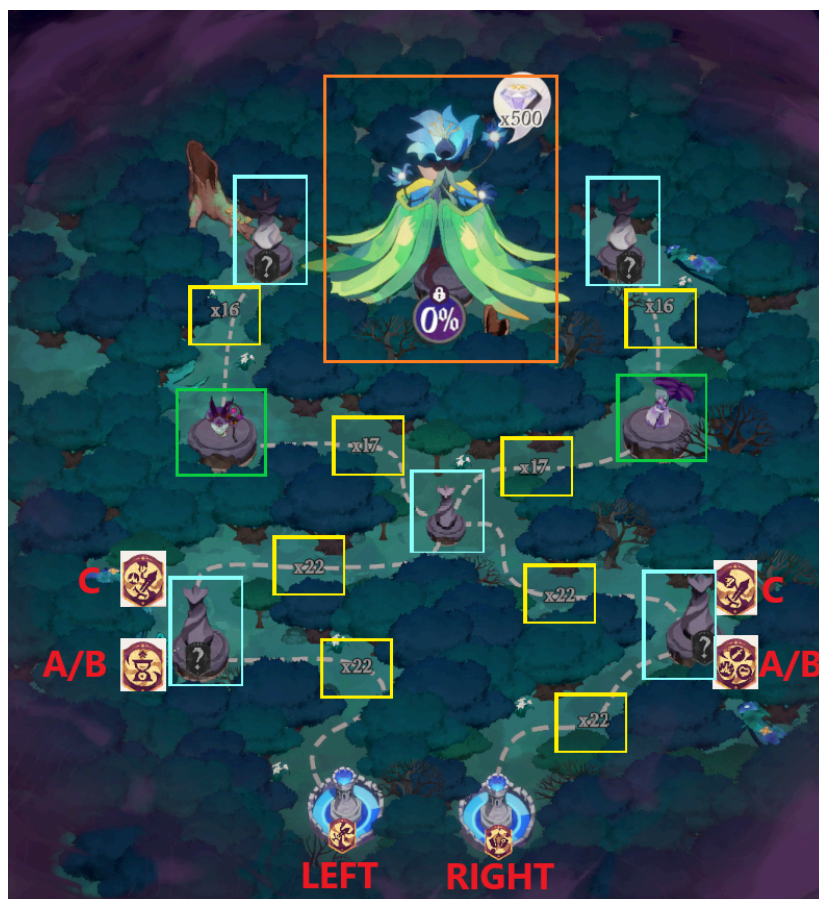

Use all of your characters for the passages. On day 3 and onwards replace 5 characters for either a boss or tower team depending on who you have ascended.

Role B = Tower and Passage

Use 10 characters on the first day to clear passages and save the upcoming 5 slots for tower/minibosses.

Role C = Tower and Boss Have 1 team for tower, 1 for minibosses and 1 for the main boss. Slot the main boss team later once you unlock the extra 5 slots. Do NOT clear passages. Team recommendations for each type of fight can be found at the end, choose the one/ones that fits you the most. Once we reach endless mode, those of you that have leftover passage/tower teams can swap to boss teams.

Map explanations: Yellow = Passage Blue = Tower Green = Miniboss Orange = Main boss
Left side artifacts: C - Focus Hit, A/B - Instant Momentum Right side artifacts: C - Rising Valor, A/B - Moment of Glory

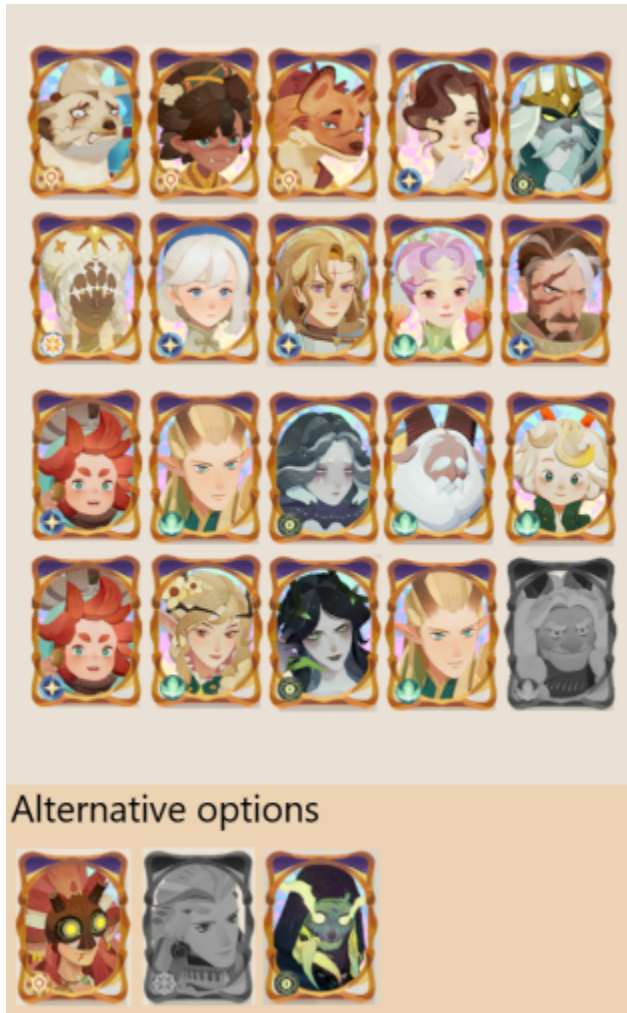

Passage teams: Just like last time, use 3 heroes in a fight and try to have them finish the fight before 60 seconds as this lets you save enough stamina for extra hits. Use your best heroes but keep faction advantage bonus in mind when forming teams. For the Day 3 swap please refer to the team options found in role C

Synergy recommendations:

Tower teams: Teams for towers consist of heroes that deal a lot of AOE damage. Use your best heroes but keep faction advantage bonus in mind when forming teams. If you're testing a team that does surprisingly well let us know.

Synergy recommendations:

Boss and miniboss teams: If you do not have reinier at M+ choose the team with korin in it. Replace heroes if your ascensions are too low.
